AS-NZ 5034 Gas Safety Compliance

Cellarwarn CO2 Monitor and Compliant Bracton and Harris Gas Regulator boards

As of 2010 OH&S (NSW) required that all businesses meet gas safety standards as described in AS/NZ 5034. Simply put, the standard requires that cellar areas be equipped with CO2 Alarms, and that gas boards be equipped with high pressure reduction regulators, pressure relief valves and other features to eliminate or reduce the chances of injury or asphyxiation due to gas leaks.

Importantly, the Standard specifies that Gas boards and CO2 alarms be tested, calibrated and/or Certified every six months to remain compliant.

Bevcon offers scheduled AS5034 semi-annual compliancy checks, with special rates for venues opting for contracted service.

	Standard Cost*	3 year Contract*	5 Year Contract *
1-2 CO2 Alarms (incl. Gas Board)	\$175.00	\$150.00	\$150.00 **
3 or More CO2 Alarms (incl. Gas Board)	\$150.00	\$125.00	\$125.00 **

* Cost is per CO2 Alarm per Servicing, and includes Gas Board Inspection

** Clients on 5 year contracts are entitled to replacement of failed CO2 alarms at no cost at any time within the contract (except where damaged due to abuse, neglect or accident)

Prices as quoted are subject to GST and include travel for Sydney Metro area, and for Hunter, Central Coast, and Illawarra regions. Other areas please call us for custom quotation
